MARGARET
ILGENFRITZ

MONROE, MICHIGAN

F O R E W O R D

Visitors are welcome at the greenhouse at any time. Hours are from 8:00 A.M. until 5:00 P.M. Monday through Saturday and by appointment only on Sunday. The greenhouse is situated on Front Street in Monroe, between Jerome Street and the railroad. A short road leads to the right off East Front Street. The greenhouse may be seen from the road.

I recommend that anyone interested in growing orchids visit the greenhouse if possible. Much more information may be gotten from such a visit than from reading articles in magazines.

The booklet on culture which I publish is as complete as practical but there are several excellent books on orchid culture available at your bookstore or library.

Plants are properly planted and shipped in their pots, unless I am requested to remove the plant from the pot. Normally they will not need repotting for six months to two years, depending on the size of the plant.

I ship all year round, and recommend Railway Express delivery. If plants are damaged when received, a claim should be filed immediately with the Railway Express Agency. All shipments are f.o.b. Monroe.

BLOOMING SIZE HYBRIDS

C trianae Broomhills X C Bebe White . . . 4" 10.00

A very good, large, pure white, flowering
mainly for the holidays. **5" 12.50**

Lc Blethleyensis X C Bebe White . . . 4" 10.00

A winter and spring blooming flower with
light sepals and petals and a good dark lip. **5" 12.50**

Lc Walter Winchell	4"	10.00
These blooms vary from light pink to dark and with an excellent purple lip. Fall and winter is the blooming time.		
Lc Louella Parsons:	4"	10.00
A heavy textured white with colored lip for fall and winter.	5"	12.50
Lc Model X Lc Princess Margaret . . .	5"	12.50
A fall blooming lavender with excellent dark lip.		
Blc. Nazarene	4"	10.00
Fairly dark sepals and petals with very colorful lip make this a fine holiday time bloom.	5"	12.50
C trianae Mrs. Cooley X C Pres. Wilson .	5"	12.50
A very good holiday hybrid with light sepals and petals and good dark lip.		
C Belle Jones X C trianae alba	4"	10.00
A good shell pink with dark lip. Blooms usually at holiday time.	5"	12.50
Bc Grace Weston	5"	12.50
An excellent Brasso, light color and good frilled lip. Fall.		

I have many more hybrids in large pots, too numerous to list. If you will tell me when you would like the plants to bloom and the colors you prefer, I will be glad to submit a list of plants for your approval.

BLOOMING SIZE CATTLEYA SPECIES

Cattleya mossiae 7.50

A near Easter flowering species that is very popular. A rose color, crisped petals, center purple, variegated with violet, throat yellow lined with purple crimson.

Cattleya schroederae, 5" pot 7.50

A near Easter or late winter blooming species of very light variable color. The purple lip is very ruffled and the bloom is extremely fragrant.

Cattleya trianae 8.50

December through February is the flowering period of this very popular species. Color rose to white with yellow in throat, often streaked with a deeper color. The lip is purple. Very free flowering.

Cattleya labiata 8.00

Considered by some the finest of the species. Flowers are large, being about 6" across, rose-lilac color with violet purple on lip and two yellow eyes in throat. Fall blooming.

Cattleya percivalliana (The Christmas Orchid) . . . 7.50

Blooming mainly in December and January, this is a good plant for beginners. Orchid colored sepals and petals with a dark purple lip with some bronze coloring.

WINDOW GARDEN ORCHIDS

All of the following plants are easy to grow with other house plants or alone. All are blooming size.

Cypripedium insigne var. Harefield Hall 7.95

One of the best of the insigne varieties. Flowers are large, dorsal sepal large bright green with brown spots, edged with white. Late fall is the blooming time.

Cypripedium fairieanum 6.50

One of the most attractive of the species. Flowers are about 3" across, light green in color striated with violet; the lip is a little shorter than the sepals, white at the base, green at apex. Late fall and winter is the blooming time.

Cypripedium hirsutissimum 7.95

An unusual color in an orchid specie. Flowers are purple margined with green and a dull green and brown pouch lip. Spring is the blooming time.

Dendrobium formosum 5.50

Reedlike pseudobulbs are about 12" tall with leathery leaves about 3" long. Flowers are in groups of three or five and are 3" to 4" across. They are white except for a yellow blotch on the lip. Very fragrant. Fall is the blooming time.

Dendrobium nobile 5.95

One of the most valuable members of this family. This specie has erect, nearly round pseudobulbs, about 2' tall. Flowers are in groups of two or three and are 2½" to 3" across; sepals and petals are white at base with amethyst tips. The lip has a broad blade with a large maroon spot in the center. Early summer is the blooming time.

Dendrobium Wardianum 7.95

Reedlike pseudobulbs are about 2' in height. The waxy white sepals and petals are tipped with amethyst while the lip has an ochre yellow disc and two dark basal blotches. Winter and spring is the blooming time.

Epidendrum atropurpureum var. randii 7.95

This remarkable specie has distinctly different colored flowers that are very fragrant and long lasting. The sepals and petals are chocolate brown edged with delicate green. The lip is rose colored. There are many flowers on each spike. Spring is the blooming time.

Epidendrum vitellinum 7.95

An easily grown, most unusual colored orchid of great popularity. The plant is somewhat dwarf in stature, has heavy textured leaves and flowers. In June and July the beautiful orange red flowers appear and remain for several weeks if the plant is kept cool and dry.

Odontoglossum grande 7.95

Pseudobulbs 3" to 4" high, leaves 8" to 14" tall, dull green thick texture; scapes 4 to 7 flowered, about 12" high. Flowers are large and very showy. Sepals bright yellow, heavily barred with chestnut brown, lip short, nearly round, white or pale yellow, sparsely blotched with red brown. Flowers in fall.

Odontoglossum schlipferianum 5.50

Large, many flowers of yellow barred with sepia. Blooms in late summer.

Oncidium cavendishanum 7.95

Fragrant yellow blooms sometimes spotted with red, with many on a spike, distinguish this almost pseudobulbless plant. It is easy to grow, requires almost constant moisture. Spring.

Sobralia Xantholeuca 7.95

A truly beautiful yellow flower distinguishes this plant. It flowers in midsummer and the flowering period is long. The stems are reedlike and quite tall in mature plants with broad plaited leaves of deep green. Even when not in bloom this is a handsome plant.

HYBRID SEEDLINGS

When ordering seedlings, please make a second choice so that lengthy correspondence may be avoided, in the event the seedling you want is no longer available.

E-10	Lc Queen Mary X C Harry Gray	2½"	3.00
	This should be a large, dark, early winter bloomer. Bred to get a good sized Harry Gray which is a dark fall bloomer. Queen Mary was dark and very large. Expect a deep rose bloom.		
E-13	C Harry Gray X Lc Barbarossa	2½"	3.00
	This is a cross for size and substance. Both parents were dark with C Harry Gray displaying a certain bronze influence from its dowiana background. Lc Barbarossa was exceptionally good sized.		
E-14	C Richmond alba X C Prince John	2½"	3.00
	A very fine Prince John was used for this cross. It was a sulphur yellow, having leathery texture. There will be a range of color from lemon white, yellow to pink from this cross.	3"	5.50
E-16	C trianae X C Clotho	2"	1.75
	C Clotho had very good shape and texture, pink rose in color. The C trianae was dark and free flowering. Fall and winter.	2½"	2.50
E-19	C Enid X C Harry Gray	2½"	2.50
	Bronze to orchid will be the result of this cross. Variable blooming time.		

CYPRIPEDIUM INSIGNE VAR. HAREFIELD HALL

ODONTOGLOSSUM GRANDE

DENDROBIUM NOBILE

PHALAENOPSIS HYBRID

E-20	C Clementine Goldfarb X C Intertexta Juliettiae alba	2½"	3.00
	A very fine pure white is expected from this cross. Fall and winter.		
F-1	C Gigas var. Sanderiana X Lc South Esk var. The Governor	2"	1.50
	The Lc South Esk used in this cross is one of the finest ever seen. Very large and dark, full shaped and extra heavy. Spring.		
F-2	C Hardyana var. Ruby X Bc Corrientes . .	2"	1.50
	A cross between two very fine flowers. Should be large and dark and very heavy texture. Late spring.		
F-3	C Enid X Lc Joan Madison	2"	1.50
	The Lc Joan Madison used here was a large, very dark flower and bloomed several times a year. A good Enid is an asset in any cross. Various.		
F-4	C Trimos X Blc Malvern	2"	2.00
	The C Trimos used was a very light orchid color, quite large and well shaped. The Blc. Malvern was one of the finest yellow orchids I have ever seen. Very large, extra heavy texture, and deep golden yellow. I expect some fine yellow and bronzes from this cross. Winter and spring.		
F-5	C Triumph X Bc Hartland	2½"	2.50
	Both parents were bold flowers. The Bc Hartland is one of the finest Brassos grown. Should be very dark. Winter and spring.		
F-6	C Mossiae X Lc Ludgate	2"	1.50
	A good mossiae crossed with a very fine Lc Ludgate should produce an Easter blooming flower of fine quality. Spring.		

F-7	Bc Gordon W. Dillon (C Gigas var Sanderiana X Bc Imperialis) This cross should produce a fine Brasso. Both plants were fine flowers. Winter and spring.	2"	1.50
F-18	C Nell Montgomery A pure white to bloom in late winter and early spring.	4"	15.00
G-12	Lc Derna X Lc Mrs. Medo AM RHS Very good yellow with purple lip.	2"	2.50
G-13	C Edithae var. La Madelon X Bc Seafoam var. Snowsheen Pure white flowers of excellent quality, to bloom in the spring, is expected from this cross.	2"	2.00
G-15	Lc Avignon var Flora X C Amabilis, Slotter's var. Another very dark cross of excellent quality.	2"	1.50
J-10	Lc Warnhamensis X Lc Siren A dark purple of good size and quality should be the result of this cross.	2"	1.50
J-12	(Lc Pacavia X Lc Aphrodite) X Duprecana A purple bloom of good quality is to be expected here.	2"	1.50
K-10	C Remy Chollet var. Bruge X Lc Invicta FFC A dark purple bloom for the Easter season will be the result of this cross of fine parents.	2"	1.50
K-11	Lc Hyperion FCC X Lc Geo, Ciejka Another dark purple of excellent quality for the Easter season.	2"	1.50

K-12	C Lady Veitch X C Barbara Dane var. Perfection	2"	2.00
	Large, pure white of heavy substance. One of these seedlings, flowering for the first time, took a gold medal. November on.		
K-16	Lc Miranda X Lc Volandia	2"	2.00
	A good bronze is to be expected here. Early winter will be the blooming time.		
K-19	Lc Model var. Moreda FCC X C Remy Chollet var. Bruge	2"	1.75
	A very dark purple bloom of excellent quality during the winter time.		
K-20	Lc Princess Margaret var. Boneycrest X Lc Bernice	2"	1.75
	The offspring of this cross will vary in color from bronze to dark purple but all should be fine. Late fall.		
K-21	Lc Princess Margaret var. Boneycrest X Lc Cameronian	2"	1.75
	Lc Princess Margaret has proved an excellent parent, so it is being used again and again. This cross will produce dark purple blooms. Late fall.		
K-22	Lc Miranda X Lc Canthab	2"	2.00
	A bronze of good quality should be the result of this cross of excellent parents. Early winter.		
K-24	C Ardmore X Lc Model var. Moreda FCC	2"	1.75
	A very good dark purple of excellent quality is expected from this cross. February on.		
K-25	Lc Cynthia var. Majestica FCC X C Dionysius alba	2"	1.75
	Gold Medal winner. A very good white with purple lip is expected from this cross.		

K-35	Blc Chief Joseph X Bc Durga	2"	3.00
	A fine large brasso from cream to gold with a large beautiful lip with plenty of gold.		
M-24	C Bow Bells X C Bow Bells	2"	3.50
	A fine, large, pure white with yellow throat. Fall.		
P-13	C mossiae "Reineckiana" (Young's var.)	2½"	5.00
	X C Gigas FMB	3"	6.00
	This cross blooms in January, February and March. Flowers are large and well shaped, paper white in the sepals and petals; lips dark, large and very interesting.	4"	12.50
R-18	Lc Sam Houston X Lc Pamela X C Gatton Ruby	2½"	3.00
	The seed parent was an 8" December bloom with deep rose sepals and petals; intense, deeply ruffled crimson lip and bright gold zone in the throat. An 8" November bloom from the dark and breath-takingly beautiful unnamed Pamela X Gatton Ruby hybrid provided the pollen. Should produce outstandingly large, dark winter blooms.	3"	5.50
R-19	C Fabia X Lc Elissa X Lc Valencia C Fabia		
	seed parent was a medium mauve	2"	2.50
	6½" bloom with a lovely frilled crimson lip, veined with golden yellow. Vigorous grower and profuse bloomer, averaging five large blooms to the spike. Autumn. Pollen parent Lc Elissa X Lc Valencia was a huge 8" dark mauve bloom with intense purple lip and yellow throat.	2½"	4.00

R-20	C Trianae X C Remy Chollet	2½"	2.50
	The trianae seed parent was a husky, compact 7" bloom with blush colored sepals and petals and deep purple lip with bright yellow zone in throat. December. Remy Chollet, having repeatedly proved its prowess as a stud plant, should again demonstrate the fine qualities of this pollen bloom 8" breadth, dark, well-held petals and sepals with vivid deep purple, frilled lip, bordered in pale lavender. Extra heavy texture.		
R-29	C Triumph X Lc Jacquinetta	2"	1.50
	Both parents of excellent dark quality should produce dark blooms. Winter.		
R-30	C Nutley albs X Lc Tirlemont	2"	2.00
	Both blooms were large, showy, pure white with lovely ruffled purple and gold lip and throats. Spring.		
R-31	C Belgica var. Robert Doig X Lc Hertha	2"	2.50
	var American Beauty	2½"	4.00
	Both of these parents were outstanding, huge show-type blooms. C Belgica var Robert Doig was a medium dark bloom with immense velvety purple lip. Winter. Hertha, a rich, rose-colored bloom with crimson lip. Winter.		
		3"	5.50
R-32	Lc Tridon X C Annie Lines	2"	3.00
	This cross should produce very large, dark blooms of exceedingly high quality.		
		3"	5.50
R-33	Lc Princess Prudence X Lc Ravenglass . . .	2"	2.50
	These are two really outstanding parents. They are among the latest and choicest of the very fine, very dark and very large new hybrids.		
		3"	5.50

R-40	C December Snow X C Angeline A fine pure white for the Holiday season.	2"	2.50
R-45	C Enid alba This is the most popular of all proven whites with colored lip. It can be depended upon to bloom prolifically, grand, big, crisp blooms of gleaming white with vividly colored lips.	2½" 3"	4.50 6.00
R-48	Lc Leda X Lc South Esk var. Sea Ranch . . . This combination of excellent parents should produce large, dark blooms in the spring.	2"	2.50
R-50	C Belgica var. Robert Doig X Bc Hartland Both parents were outstanding show-type blooms, very dark, with good lips. Winter.	1¾"	2.00
R-54	Lc Ludgate X Lc Princess Margaret Top quality, richly dark blooms for winter will be the result of this cross.	2"	2.00
R-56	Lc Princess Margaret X Blc Dawn Angela A pure white with colored lip for winter.	2"	2.00
R-58	Lc Ida S Myers A cross of Lc Windemere, AM and an extra fine, dark C Enid made this recently registered hybrid. All of the first crossing which have bloomed were heavy textured, large and dark. Season varies.	2½"	4.00
T-10	C Syros X C Gregoria Flowering season early fall. Both parents had very large blooms, C Gregoria being very dark.	3" 3½"	5.50 7.00
T-11	C Yuma (C Achine X C Intertexta) Both parents are known for their fine flowers. Large, dark flowers are expected. Winter.	3" 3½"	5.50 7.00

T-12	C Jevans X C Mrs. Frederick Knollys . . . Jevans is one of the strongest growers we have ever seen. Flowers freely. This cross should produce fine blooms. December.	3"	5.50
W-1	Lc King George X C Enid alba Lc King George is one of the very finest whites with colored lips, and the C Enid was a fine one. Should produce outstanding blooms in late spring.	2" 2½"	2.50 3.50
W-2	E Enid Superla X Lc Princess Margaret . . Both strong growing parents. The resulting cross should produce fine late spring blooms.	2"	2.00

PHALAENOPSIS

Blooming Size—Winter and Spring

Doris X Amabilis: Two fine white parents should produce excellent blooms	Small Medium	5.00 7.50
Pink Pamela: Large, nearly white	4" 5"	6.50 8.50
Pink Hawaii: Large pink flowers—very good form	4" 5"	6.50 8.50
Gloriana: Medium sized flowers, but good dark pink color	4" 5"	6.50 8.50

BOOKS

HOME ORCHID GROWING, by Rebecca C. Northen . . . 6.50

This book will guide you in every phase of orchid culture. Discusses the Cattleya, Cymbidium, Dendrobium, Odontoglossum and other tribes. Contains information on methods of culture for both home and greenhouse. Has 11 full color plates, 108 black and white photographs. 286 pages.

ORCHIDS ARE EASY TO GROW, by Logan & Cospers . . . 6.00

A very complete book on orchids for beginners and those with some experience.

A B C OF ORCHID GROWING, by John V. Watkins . . . 3.00

Also a good book for beginners. Not as complete as the above, but still gives all the information a beginner needs.

TERMS: *Cash with order.*

3% sales tax must be added to Michigan orders.

Seedlings should bloom approximately according to the following schedule:

Pot Size	Time Before Blooming
1 $\frac{3}{4}$ "	3 $\frac{1}{2}$ to 4 years
2 $\frac{1}{2}$ "	2 $\frac{1}{2}$ to 3 years
3"	2 to 2 $\frac{1}{2}$ years
3 $\frac{1}{2}$ "	1 $\frac{1}{2}$ to 2 years
4"	6 months to 1 year
4 $\frac{1}{2}$ " and 5"	Should bloom on the next lead

Occasionally seedlings lose their identity when tags are lost. I have a limited quantity of these available, all good crosses, at the following prices: 2", \$1.50; 2 $\frac{1}{2}$ ", \$2.00; 3", \$3.00.

ORCHID SUPPLIES

Osmunda Fibre	\$1.25 per pound
Red Identification Tags25 per dozen
MacCarl Fog Maker	5.45 each

MAC CARL FOG MAKER

DISTINCTIVE FEATURES

Sprays Fine Fog Mist

Lifetime Guarantee

OPERATES ONE HAND—Positive trigger action pump. Convenient to handle—easy to use.

TWO SPRAY HEADS — Included with each FOG MAKER.

NON-CORROSIVE—Heavy duty nickel plated brass parts.

COPPER CONTAINER—Sturdily built—18-ounce capacity. (Withstands hard use.)

SPRAYS NON-RESIDUE SPRAY LIQUIDS—Such as water, insecticides, deodorants, germicides, moth proofing, sizing and water repellents, etc., etc.
